https://chekkour.github.io/chekkour-abderaouf/

Master graduate from USTHB (2026), with academic and internship experience in geographic information systems (GIS), remote sensing and environmental analysis. Completed a dissertation with USTHB and the Algerian Space Agency (ASAL) on forest fires, using satellite imagery, climate data and thematic mapping. Seeking further study and research training in spatial analysis and environmental risks.

EDUCATION

Université des Sciences et de la Technologie Houari Boumediene (USTHB) - Algiers | 2024 - 2026

Master - Aménagement régional et compétitivité territoriale

• Regional planning and territorial competitiveness; degree awarded in 2026.

USTHB - Algiers | 2021 - 2024

Licence - Aménagement du territoire

• Territorial planning.

INTERNSHIPS

Algerian Space Agency (ASAL) - Algiers | 2025 - 2026 | 9 months

Internship and Master dissertation work with ASAL and USTHB

• Mapped burned areas and fire severity in Tizi Ouzou after the August 2021 fires using Sentinel-2 imagery and spectral indices.

• Processed ERA5 climate data to examine the meteorological context of the fires and produced thematic maps for the dissertation.

• Received support from forestry services for field verification of the mapping work.

Centre National d'Études et de Recherches Appliquées en Urbanisme (CNERU) - Algiers | December 2024 | 1 month

Urban planning and GIS intern

• Gained introductory experience with ArcGIS and QGIS in an urban planning setting.

ACADEMIC ACTIVITIES AND COMMUNITY INVOLVEMENT

USTHB | December 16–17, 2025

ICBT 2025 - Joint poster at an international conference

• Co-authored a poster with Mohamed Mounir MESSEGUEM on wildfire exposure of roads, electricity networks and the population in El Tarf (Algeria) and Jendouba (Tunisia).

Club scientifique Orbis - USTHB | 2024 - 2025

Secretary General

• Coordinated workshops and study days, organised volunteer tasks and prepared activity reports.

University field studies: Batna: hydrology, climatology and rural planning. Sétif: territorial marketing and tourism.

ADDITIONAL INFORMATION

Tools and methods: QGIS, ArcGIS / ArcMap; Sentinel-2 imagery, spectral indices, ERA5 climate data; thematic mapping and spatial analysis.

Additional training: NASA ARSET fundamentals of remote sensing; Esri courses in spatial analysis, cartography and GIS data management.

Languages: Arabic: native; French: B1; English: B1 (self-assessed).
